

## Healthcare

Healthcare is about helping people to stay healthy, and caring for them when they are sick. Many of these jobs are in hospitals and clinics. Others are done in homes and offices. No exam level jobs...

### Hospital Porter

**Hospital Porters** move patients from one part of a hospital to another. Sometimes the patients are very weak or ill and the porter needs to keep them as comfortable as possible. They may be moved on special hospital trolleys or in wheelchairs. Hospital porters also move other things, such as equipment. They take meals and clean sheets to the hospital wards and take post around the hospital.

### Hospital Housekeepers

**Hospital Housekeepers** clean areas such as clinics, waiting rooms and operating theatres. They also do other jobs that help to keep the hospital running smoothly.
